# GPX Battery Audio Repair Kit

**Brand:** steelPHASE  
**Product Code:** GPXBATTKIT  
**Availability:** 5 - 7 Business Days

**Price: \$23.00**

## Description

Other than faulty headphones or power cables, most other audio issues are caused by a fault in the GPX battery unit.

Faults can include:

- no audio
- buzzing noise in audio
- distorted audio

The repair kit contains:

- 2 x Schottky Diodes
- 2 x Analogue Switches
- 1 x Op Amp IC
- basic instructions

Please note: All the components are SMD. This means they are very small. If you are not confident soldering connections the size of a pinhead, then this kit is not for you. There is no guarantee on repair kits we supply as we can not verify purchasers soldering abilities.

We do offer a repair service for those not confident in their soldering abilities.
